What next?

This is a Wall Street Journal article:

A debt we can never repay: the Jewish state is safeguarding the very future of civilisation  
How will we ever repay the debt we owe Israel? What the Jewish state has done in the past year – for its own defence, but in the process and not coincidentally for the security of all of us – will rank among the most important contributions to the defence of Western civilisation in the past three-quarters of a century.

  
Mm. It's hard to read and far from peace related so trigger warning sisters.

The guest speaker at Emanuel last Friday was a lighter weight version of this.

Hard to hear, so I reminded myself of the multiple truths that exist about this war and tried to focus on my compassion for all humans and their perspectives.

Not sure I got there 😞

IT WORKED!

Rubbish. I'm an American, supporter of Israel and a lifelong Democrat. Life in the U.S. was much better under Biden and Obama. Trump is a salesman of snake oil. His only superpower is his ability to tap into populist anger. Now that he has full immunity from prosecution and likely all branches of power in the U.S. ... we'll see what he can do. He's been there before so unless you remember something I don't ... don't hold your breath.
